	Project Settings

1, Project settings on the VTH

Check Project settings>IPC Info

Set the IPC name and IP adderss, fill in the user name and password (default is user name = admin, and password = admin)

IP Camera					Live	Playback	Setup	Alarm	Logout

		Default	Refresh	Save					

2、 Set on the IPC web interface

Check Setup>Video

You just need to set the sub stream, make sure choose the resolution as D1(704*576), and don't check the watermark settings.
